

1.1 Brainstorming & Idea Prioritization

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer Ideation Phase

Step 1: Team Gathering, Collaboration and Problem Selection

The team met to agree the problem: manual, slow and opaque IT procurement, starting with standard laptop orders.

Step 2: Brainstorm and Idea Listing

#	Idea	Description
1	Service catalog item	Standard laptop request form with model, justification and cost centre.
2	Rule-based auto-approval	Auto-approve standard models for eligible users.
3	Tiered approval routing	Manager approval for exceptions; finance approval above a threshold.
4	Auto PO generation	Create the PO and notify the vendor on approval.
5	Status notifications	Updates at submit, approve, order, ship and deliver.
6	Asset record update	Create or update the asset record on delivery.
7	Chatbot intake	Virtual agent for conversational requests (future).
8	Vendor price comparison	Compare vendor quotes automatically (future).

Step 3: Group Ideas

Theme	Ideas
Request and intake	Service catalog item, chatbot intake
Approval	Auto-approval, tiered approval routing
Fulfilment	Auto PO generation, vendor price comparison, asset record update
Communication	Status notifications

Step 4: Idea Prioritization (Impact vs Effort)

Idea	Impact	Effort	Decision
Service catalog item	High	Low	MVP
Rule-based auto-approval	High	Medium	MVP
Tiered approval routing	High	Medium	MVP
Auto PO generation	High	Medium	MVP
Status notifications	Medium	Low	MVP
Asset record update	Medium	Medium	Stretch
Chatbot intake	Medium	High	Future
Vendor price comparison	Medium	High	Future
