

1.3 Empathy Map

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer Ideation Phase

Primary user: Employee requesting a standard laptop

SAYS	THINKS
"Where is my laptop request?" "Has my manager approved it yet?" "Why does this take so long?"	"I cannot start work properly without a device." "Nobody knows the status of my request." "There should be an easier way."
DOES	FEELS
Sends emails and follow-ups Pings the manager and IT desk Waits with no updates	Frustrated by delays Anxious about deadlines Ignored when there is no status

Pains and Gains

Pains	Gains
Long waiting time No visibility of status Repeated follow-ups Unclear who owns the request	Fast, standard request in minutes Real-time status and notifications Auto-approval for eligible requests Clear ownership at every step
