

Project Executable Files

Project: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

The project is built on the ServiceNow platform. The following components make up the executable solution:

No.	Component	Type	Description
1	Standard Laptop	Catalog Item	Request form with model, justification and location
2	Standard Laptop Order	Flow (Flow Designer)	Main automation from request to closure
3	Laptop Manager Approval	Subflow	Handles manager approval and returns the decision
4	Create Procurement Task	Subflow / Action	Creates task for the IT Procurement group
5	Laptop Order Notifications	Notification	Status emails to requester and approver
6	Update Set	XML export	Packages all components to move between instances

How to Run

Import the update set, commit it, activate the flow, and open the Standard Laptop item from the Service Catalog to place a request.
