

No. of Functional Features Included in the Solution

Project: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

The solution includes the following **6 functional features**:

No.	Feature	Description
1	Standard Laptop Catalog Item	A simple request form with laptop model, justification and delivery location
2	Automated Flow Trigger	Flow Designer starts automatically when the request is submitted
3	Manager Approval Workflow	Approval request sent to the manager, with approve/reject handling
4	Automatic Procurement Task Creation	Task created and assigned to the IT Procurement group after approval
5	Email Notifications	Status updates to requester and approver at each stage
6	Request Status Tracking	Request state updated automatically through to closure, visible to the requester
